CHAPTER VIII

Consorcio de Gestión del Puerto de Bahía Blanca

TARIFF SHEETS (Updated October 27th, 2026)

1 - TAX ON THE USE OF NAVIGABLE WAYS

UVN = TU * TONS * K1 * K2

UVN = Tax on the use of navigable ways.

TU = Tax by unit load.

TONS = Gross tons loaded or unloaded by the vessel.

K1 = Vessel capacity coefficient.

K2 = Coefficient by navigation leg.

Basis: In US dollars, by gross ton or fraction loaded or unloaded by the vessel, considering the leg travelled and the vessel capacity, to be paid in pesos according to the exchange rate of the Banco de la Nación Argentina, seller, corresponding to the sailing date closing or next bank working day, if this was a holiday.

1.1. Tax by unit load. USD 1.55 by gross ton or cargo fraction. (Decision 22/25)

1.2 Vessel capacity coefficient

Vessel NRT.	K1 coefficient
Up to 5,000	0.60
From 5,001 to 10,000	0.85
from 10,001 to 17,000	1.00
above 17,000	1.15

1.3 Coefficient by navigation leg

Leg travelled	**K2 Coefficient K2**
Km 100 to Km 0	1
Km 100 to Km 20	0.9
Km 100 to Km 50*	0.7

* Dec. N° 43-CGPBB-2023.

1.4 - For vessels not performing loading or unloading of goods, the tons variable (TONS) in the formula will be equivalent to twenty percent (20%) of the Net Registered Tonnage of the vessel.

1.5 – Surcharge for use of navigable way (Dec. 48/22)

Its purpose will be to carry out new works to widen and deepen the waterway, equipment for navigation safety, port infrastructure works that generate better conditions of navigability and operability in the ship-port interface, as well as pre-port, road and railway connectivity, essential to ensure a flow of cargo in sufficient volume to meet the demand of ships that, in greater quantity and dimension, will be able to access the terminals of the Bahía Blanca port system.

Calculation methodology: The same methodology provided for the calculation of the Tax on the Use of Navigable Ways, foreseen in Sections II and VIII (part 1) under Title 1 of the Port of Bahía Blanca General Rules and supplementary rules in force will be used. Likewise, all the other rules therein corresponding to the Tax on the Use of Navigable Ways will apply.

Tax by unit load: USD 0.50 by gross ton or cargo fraction. (Dec. 22/25).

Validity: For ten (10) years, as from November 1, 2022 inclusive.

Exemption of container ships
The ships performing only full and/or empty container loading and/or unloading operations are exempted from the payment of the Tax on the Use of Navigable Ways.

2 - TAX ON THE PORT USE

2.1 -Applicable taxes

2.1.1 - Docks (Res. 22/25; 26/25)

Basis: In US dollars, by Net Registered Ton or fraction and by day or fraction, to be paid in pesos according to the exchange rate of the Banco de la Nación Argentina, seller, corresponding to the sailing date closing or next bank working day, if this was a holiday.

	Overseas (International)	**Cabotage (National)**
Location to berth	0,46	0,25
Other position	0,30	0,16

Methodology to calculate vessel stay at port (Res. 13/95)

It will consist of the application of coefficients to the tax on port use, according to the time they access or leave the berth.

For the days of access or sailing of the vessels, a coefficient will be applied over the Tax on port use, related to the time when the operation is performed, dividing the day in thirds as follows:

Entrance

Time	00:00 to 08:00	08:00 to 16:00	16:00 to 24:00
Coefficients	1	0,67	0,33

Departure

Time	00:00 to 08:00	08:00 to 16:00	16:00 to 24:00
Coefficients	0,3	0,67	1

The coefficient corresponding to the sum of the thirds between which the entrance and sailing operations took place will be applied to vessels arriving and sailing on the same day.

To calculate the rate, the vessel access time will be considered when the first mooring rope is on land, and the sailing time will be set as the time when the last rope is slipped.

If the vessel berthing is verified within fifteen (15) minutes before the start of each third, or if the vessels sail within fifteen (15) minutes after the ending time of each third, one (1) additional hour will be considered in their lay time. Once this period is exceeded, the corresponding third will be considered.

The price of the additional hour will be calculated on the basis and values set forth in item 2.1 and will be equivalent to one twenty fourth (1/24) of the tax corresponding to the vessel traffic type.

To set the coefficient to be applied to calculate the rate, the vessel berthing time will be considered the time when the first mooring rope is on land, and the sailing time will be set as the time when the last rope is slipped.

Port use payment exemption (Dec. 20/03).

The vessels berthing on working days and Saturdays, from 21.00 to 24.00 or on Sundays and holidays from 00.00 to 24.00, are exempted from payment of the Port Use Rate corresponding to the above mentioned berthing times, and the lay time count starts as from 00.00 of the next working day, including Saturday.

This exemption does not apply to the vessels starting operations within the berthing days and times above mentioned.

Exemption of container ships

The ships performing only full and/or empty container loading and/or unloading operations are exempted from the payment of the Tax on Port Use.

2.1.2 - Floating berth

The tax will be considered at the level of item 2.1.1 - Other position.

2.1.3 - Anchorage

When a vessel is not waiting for an available site to operate in fix or floating terminals inside the system, it will pay fifty percent (50%) of item 2.1.1 - Other position.

2.2 - TAX ON FREQUENT PORT USE

2.2.1. Vessels smaller than 50 NRT, for service or transporting goods. (Dec. 4/14)

Basis: by vessel and by calendar year quarter in advanced or fraction thereof, in United States dollars.

Rate: USD 500.00

2.2.2 - Coastal and middle distance fishing vessels and recreational boats
(Dec. 4/14)
